**DEATH OF MR. J. M. STOD  
MINING ENGINEER.**

The following Telegram, has been received from Rant, bearing date 10th January, 1891:—

'Rant Hole. Export to survey about beginning of next week. No export to begin.'

The 'no change' of course refers to the political situation; but the 'no export' and 'beginning of next week' may mean otherwise to trouble Rant.

The following is Mr. Bibby's report for the fortnight ended January 7th:—

**Rant Hole.**—The work of taking water out of this part of the mine, and sending it to the surface, has been done by means of a steam engine and a pump, but it is difficult to say how much will be able to get to it, as that will depend on the weather, which has been very variable. A large amount of debris washed into the mine has been removed, and so far as can be seen, the only damage has been done to timbering.

**Water Lock.**—Work is being carried on in this part of the mine, slopes over the back of the north main are about the same as at date of last report. The progress in this part of the mine is being kept to the main line with the work.

The main level north has been 20 to 25 feet. There is a wall-defined level of level 2 foot thick, which has been found to be a fair one. A fair old can be got from it by boring. From appearances I think

have a good look in this case before  
Engine Staff has been sued and  
8 feet well. The timber is cut and fitted  
all well. I hope to have them there  
time during the ensuing fortnight  
we weather has also interfered a  
with this work. An engine and  
distance will interfere with go-  
widening machinery into position.  
Reports say it has arrived from Lab-  
ports say that the "Always new  
most of the machinery into the  
book track," but the course is only  
and may not be true.

Dam.—Slow progress in being  
this work owing to the weather as  
many of the Chinese getting their  
clearing out. A number of them  
been taken to carry stores for the  
in fact, at present our labor  
Ran is very limited and not suit-  
requirements.

Battery.—This is still able to  
to remain until the work of  
water to level of race to battery.  
now I estimate, 280 tons of grain  
at the battery.

General.—In the present state  
of the country it is impossible to  
work as I should like to. I am re-  
limiting my operations to those re-  
volvements and urgency which are  
allowed to stand. It was the  
of very serious consideration, in  
how we are to get supplies to the  
limited number of colonies within  
present. I see no prospect of  
transport being resumed for some  
time as it is not possible to fill  
the one at Kiangtung. To be  
a state of things there.
